

**PATIENT TESTIMONIAL**  
Pediatric Enteral  
Nutrition

Twins, Molly and Madeline Farrell, were born 3 1/2 months premature on January 6, 2009. Molly was 12 inches and weighed 1 lb. 12 oz. and Madeline was 13 inches and weighed 1 lb. 13 oz. Both girls were undeveloped and suffered from infections, as well as, respiratory distress and failure. Molly came home in June of 2009 at the age of 5 months. The day Madeline was supposed to come home, she was rushed to Children's Hospital Boston for pulmonary hypertension. She was placed on a ventilator and kept lightly sedated. A year later, Madeline was finally taken off the ventilator.

## Home Solutions Canton Office: Success Story

---

On June 14, 2010, at the age of 17 months, Madeline was finally able to go home. Reunited with her twin sister, Molly, they instantly connected with one another after almost a year and a half apart. The Farrells were finally all together and their family was "complete".

As both of the girls are dependent on tube feedings, Home Solutions has had the pleasure of providing Enteral feedings and supplies to both Molly and Madeline since they have returned home.

It has been very rewarding to see the twins grow up and Home Solutions has worked closely with their Mom, Amy, to provide the quality-of-care that is needed for her children. For Home Solutions, it is not just about coordinating their supplies and deliveries, but more so, about following the girls' care and helping Amy with changes that will make things easier for her as she tends to the twins' needs. Home Solutions' motto is "treating patients like family" and the Farrells have definitely become a part of our extended family.

BABY MOLLY 3 1/2 MONTHS PREMATURE

Now at age 2, Molly and Madeline are both doing great! Molly is now 27 pounds and Madeline, 28 pounds. Each with their own personalities, Amy reports they are both very happy and glad to be at home with their family.

Parents, Peter and Amy Farrell, enjoy sharing their positive home infusion experience with the hopes of helping others.

## List of Services

---

- Antibiotics
- Parenteral Nutrition
